About me

My name is Florian, I'm a 22 years old, currently working @Keymetrics, Paris since 2017

I have always been interested in computers and technological devices, especially those using IoT services

I am curious and love all of the new technologies

Experiences

R&D Engineer

Keymetrics, Paris, january 2017-present

Developed PM2 agents that connect client applications to Keymetrics servers with OpenCensus integration in Golang (including CPU and memory profiling) and Python

Worked on on-premise deployment with Docker, K8S, GKE, Helm, Terraform

Made a prototype of digital signage screen using Node.js, Electron and Yocto OS builder

Web developer

Listen Network, Paris, november 2016
OAuth2 server with Node.js and Angular2

Skills

Server application with Node.js, mastering of callbacks and promises, maintainer of some modules

Development of several backend projects (REST API, SOAP client, BitTorrent, etc...)

Java/Kotlin application development for REST APIs. Using Google Material Design and Android APIs or Flutter

Used MySQL, SQLite, PostgreSQL (TimescaleDB), MongoDB, Elasticsearch for different projects

React (Grommet/Carbon Design System), VueJS (Vuetify)

Electronics, Git, Docker, Unix (Linux, Mac), Shell/Bash, K8S (Kubernetes) lover, C, C++, etc...
